PROJECTS

Food Restaurant Backend ↗
Jun 2025 - Jul 2025

Designed and developed a secure and scalable RESTful API for a food ordering system. Features include user authentication (JWT), menu and order management, table reservations, and cart functionality. Built with Node.js, Express, and MongoDB/MySQL, with clean documentation via Swagger and tested using Postman.

AI ChatBox VSCode Extension ↗
Jun 2025 - Jul 2025

A lightweight VSCode extension that integrates AI-powered chat directly into your editor. Get instant code explanations, debugging help, code generation, and natural language support without leaving your workspace. Ideal for developers looking to boost productivity with AI assistance.

NextJS Ecommerce Project ↗
Jul 2025

Built a full-stack e-commerce app using Next.js, MongoDB, and Node.js with NextAuth.js for authentication and Stripe for payments. Implemented product listings, cart, checkout, and responsive UI with Tailwind CSS; deployed on Vercel.

Coin Gecko Crypto Tracker ↗
Jun 2025

Developed a dynamic crypto tracker web app using React.js, Chart.js, and CoinGecko API. Implemented real-time price updates, coin search, filtering, and interactive charts for market trends. Optimized with React Context API and Zustand for state management.

My Contacts - Backend ↗

Mar 2025 - Apr 2025

Built the backend for MyContacts, a contact management API using Node.js, Express, and MongoDB. Features include JWT authentication, CRUD operations, bcrypt password handling, and input validation, with a modular structure for scalability and efficient error handling.

InstaGram Clone - Backend ↗

Sep 2024 - Nov 2024

Designed and implemented the backend for an Instagram clone, enabling user registration, login, post creation, and a user feed. Utilized Node.js and a NoSQL database.

Message Slack - Full Stack MERN Project ↗

Jan 2025 - Feb 2025

Developed a real-time messaging web app inspired by Slack using the MERN stack (MongoDB, Express.js, React, Node.js) with Socket.io integration for instant communication. Implemented user authentication, channel-based chat, and responsive UI for seamless team collaboration.
